Jakarta Pusat, Jakarta, Indonesia

Experienced Fullstack Engineer with 3+ years building end-to-end web solutions using TypeScript as the core language. Expert in crafting dynamic frontend interfaces with Vue.js and ReactJS, and developing robust backend services with Express and NestJS. Strong background in CI/CD pipeline setup, cloud infrastructure, and production deployment. Proven ability to design scalable system architectures and deliver real-time, collaborative applications in remote or hybrid team settings.

Work Experiences

Software Engineer - Jakarta Pusat, Indonesia <i>PT. Pegadaian</i> - Translated business requirements into technical specifications and implemented robust, user-friendly interfaces. - Contributed to the continuous evolution of Pegadaian's digital landscape by extending and enhancing application functionalities. - Engaged with a diverse range of projects, including the CSR Web App, B2B Web App, and Microsite Pinjaman. - Utilized: Vue js, Pinia, Typescript, Nest Js, Redis, PHP, Codeigniter 3, Postgresql, SCSS, AjaxJS.	May 2023 - Present
Web Development - Pekanbaru, Indonesia <i>PT. Sumatera Kalimantan Jaya</i> - Designed and implemented a Profile Company website using Codeigniter in 14 days. - Implemented MPOS application to regulate the sale and stock of the company's products with 3-person. - Utilized: PHP, JavaScript, JQuery, HTML, CSS, Codeigniter, Bootstrap.	Apr 2021 - Jul 2021
Web Development - Pekanbaru, Indonesia <i>Freelance</i> - Develop responsive and user-friendly web applications using React.js, Node.js, Express.js, and other relevant technologies. - Integrate web applications with databases such as MongoDB, MySQL, and Postgresql. - Use front-end frameworks such as React.js, Material UI, and tailwind to create visually appealing and engaging user interfaces.	Sep 2021 - Jan 2023

Education Level

Universitas Riau - Pekanbaru, Indonesia <i>Bachelor Information System, 3.69/4.00</i> Relevant Coursework: Algorithms; Data Structures; Software Engineering; Object-Oriented Programming; Database;	Sep 2016 - Oct 2020
--	---------------------

Project Experience

PT. Pegadaian - Singel APP (Pegadaian Kita) - Built modular and reusable frontend components based on UI/UX team specifications using Vue 3 Composition API and Tailwind CSS, ensuring visual consistency, responsiveness, and accessibility. - Actively contributed to a company-wide Micro-Frontend Architecture, allowing multiple teams to work in parallel and independently deploy features without breaking other domains. - Ensured seamless integration with microservice-based backends, collaborating closely with backend teams to define and consume APIs effectively. - Developed and maintained unit tests using Vitest, consistently achieving ≥80% code coverage, which strengthened CI/CD pipelines and reduced bugs in production. - Advocated for clean code practices and component-driven development, leading to easier maintenance and faster feature delivery. - Utilized :Vue 3 JS, NestJs, Tailwind, Postgresql, Redis, Vee-validate, Zod, Pinia, Nodejs, GitLabs.	Nov 2024 - Present
PT. Pegadaian - Microsite Pinjaman Pegadaian - Revamped legacy CodeIgniter 3 monolith into a scalable NestJS microservices architecture, improving performance and maintainability for the loan lead generation platform. - Implemented Microservice Backend to make it an efficient and scalable Service. - Designed and architected 9 backend services using Factory pattern, enabling dynamic support for multiple loan products including Kredit Usaha Rakyat, Serba Guna, and Cicil Kendaraan. - Developed and maintained comprehensive unit testing, achieving high test coverage to reduce regression and ensure backend reliability. - Created clear and structured technical documentation, facilitating effective knowledge transfer and smoother team role transitions. - Integrated with other App Mitra Pegadaian. - Utilized: Vue js, Pinia, Typescript, Nest Js, Redis, PHP, Codeigniter 3, Postgresql, Crontab.	Jan 2024 - Present

PT. Pegadaian - KAMILA Application

May 2023 - Present

- Developed and maintained the FE and BE, ensuring a responsive, intuitive user interface and build microservice development application for internal Pegadaian employees.
- Developed backend modules for marketing progress tracking, marketing plans, and weekly marketing reporting, supporting data-driven sales strategy.
- Built a backend module to manage employee KPI tracking, enabling performance measurement and evaluation.
- Continued the development of the loan lead submission feature from Pegadaian's external business partners, enhancing integration and collaboration.
- Utilized Express.js for backend services and React for frontend development to build a modern, responsive system.
- Utilized :ExpresssJs, ReactJs, Tailwind, Postgresql, Redis, Typeorm, Redux. Nodejs, GitLabs.

PT. Pegadaian - Reconciliation System (AIRA)

Jan 2024 - Present

- Continued the development of the reconciliation transaction module for integration with additional partner banks.
- Ensured that the generated reconciliation transaction processes are compatible and consumable by Pegadaian's core banking services.
- Verified that reconciled transaction journal entries comply with the accounting division's standards and requirements.
- Utilized : PHP Version 5, SFTP, VM, PHP Native.

Universitas Riau - Thesis Chatbot Kukerta Information System

- Create a conversation application with the kukerta admin who is a bot with the fuzzy string matching method so that the question match rate can be 80% according to input from users.
- Designed and implemented a question dialogue in the form of 3000 data about the questionnaire which is processed to produce good knowledge for chatbots in 1 month of research on existing questions.
- Utilized: Python, JavaScript, JQuery, HTML, CSS, Flask, Bootstrap.

Skills, Achievements & Other Experience

- **Frameworks:** Vue JS, React Js, NodeJS, ExpressJS, NestJS
- **Languages:** Fundamental in TypeScript and JavaScript, CSS in JS, Tailwind, SQL, NO SQL, Redux, Zustands, Pinia, Zod, Vee-Validate
- **Relevant Skills:** Web Performance, Web Accessibility, Clean Code, Software Testing, CI/CD, REST API, Unit Testing
- **Developer Tools:** Git, Gitlab, SonarQube, Npm, Yarn, Postman, Testing Library, Swagger, Docker, Jenkins, Jira
